
AppDirect Security Standards and Protocols

Safeguarding customer data and privacy across every marketplace

Overview

Data breaches are a serious concern for businesses around the world. Not only do breaches put sensitive financial information at risk, but they can also badly damage a company's reputation. At AppDirect, we understand these issues and take security concerns very seriously. That's why we have made it a top priority to adhere to industry-leading security standards and protocols to ensure that customer data remains private and safe.

Payment Card Industry Data Security Standards (PCI-DSS) Level 1

AppDirect is certified PCI-DSS Level 1 compliant. The PCI Security Standards Council has set a high bar for data security, specifically credit card and billing information. The organization has created several levels of PCI compliance, with Level 1 being the most rigorous. Level 1 PCI compliance requires a top-to-bottom independent audit of a security controls, processes, policies and infrastructure.

A copy of AppDirect's Attestation of Compliance (AoC) is available upon request.

European Union (EU) Safe Harbor Certification

AppDirect is certified EU Safe Harbor compliant. The European Commission's Directive on Data Protection prohibits the transfer of personal data to non-EU countries that do not meet EU standards for privacy protection. These laws are designed to prevent the accidental disclosure or loss of personal information.

AppDirect is certified by the United States Department of Commerce as being EU Safe Harbor compliant (pursuant to EU Directive 95/46/EC).

California Data Protection Act

AppDirect adheres to strict data protection laws at the state level. Since AppDirect is located in California, the company is subject to some of the strictest privacy laws in the United

States. In addition to implementing security measures, state law requires AppDirect to destroy information no longer needed by the business and follow other practices to keep data safe.

The AppDirect Advantage: Industry Leading Platform and Expertise

AppDirect is the leading cloud service marketplace company. Our innovative platform offers the advanced functionality that companies need to launch and manage their cloud service marketplaces effectively. With AppDirect, companies can launch a fully branded, customized application marketplace without the time and expense associated with developing a solution in house. We power application marketplaces for trusted enterprises around the world, including Staples, Comcast, Deutsche Telekom, Bell Canada, Swisscom, and more.
